United Nations Office of Project Services Selects RCC to Develop Communications System for EMS in Kurdistan

Woodbridge, NJ (September 30, 2011) – RCC Consultants Inc. was selected by the United Nations Office of Project Services (UNOPS) to assist in developing a communications system for emergency medical services (EMS) in the Kurdistan region of Iraq.

RCC will provide project management, technical support and IV and V services to UNOPS. The project includes the installation of a new emergency number system, Computer Aided Dispatch (CAD) system, Automatic Vehicle Location (AVL) system and radio communications system.

The objective of the project is to assist the Ministry of Health of Kurdistan Regional Government, which is implementing the project, in building capacity in establishing rapid, coordinated and effective response services to health emergencies, including those resulting from acts of violence, accidents or natural disasters. The World Bank is funding the project.

About RCC Consultants, Inc.

RCC Consultants, Inc. is a global telecommunications consulting and engineering firm. We have assisted public safety agencies with their communications needs since 1983, and specialize in the planning, design and implementation of interoperable radio systems, microwave and fiber optic systems, broadband, enterprise telecommunications systems, communications centers, tower sites and monitoring facilities.

On the operational side, we have created hundreds of interoperable communications plans, governance plans and Standard Operation Procedures (SOPs) for cities, counties, regions and states. On the technical side, we have managed more than 4,000 communications and information systems projects, ranging from reconnecting subway communications at the World Trade Center to designing the requirements for some of the country's largest interoperable radio systems, including Philadelphia and Houston.
